Industrial Series

Diaphragm Operated Pressure Switch

Models: S21, S22 & S24

Key Features

- Weatherproof and Flameproof models ATEX and NEC 500.
- NACE MR-01-75 compatibility.
- Ranges available up to 700 bar (10,000 psi).
Maximum working pressure up to 1000 bar (15,000 psi).
- Field set point adjustment against a reference scale.
- Hermetically sealed microswitch options.
- Optional gold alloy contacts.
- Terminal block for easy field wiring.
- Safety vented design as standard.
- PED 2014/68/EU CAT IV option.

Series Overview

- The Industrial Series switches were developed in the mid -1990's to offer customers a robust range of switches suitable for applications where requirements were more standard than those for which the highly configurable Performance Series switches were designed.
- Using diaphragm based sensors and a more traditional in-line force balance mechanism to transfer movement from the sensor to the microswitch, these switches are suitable for a wide range of industrial applications. Various international approvals make the Industrial Series suitable for use in both safe and Hazardous Areas in Europe, North America and throughout the world.

Other products in the series include:

- Differential Pressure Switches: Model S30
- Temperature Switches: Model S70

Product applications

The S20 Industrial Series is suitable for a wide range of applications in:

- Oil & Gas
- Chemical
- Petrochemical
- Refining
- Power
- OEM

The choice of models available ensures that the S20 Industrial Series is suitable for use in:

- Corrosive atmospheres
- Resistant to chemical attack

How to order

Switches can be configured by selecting codes representing the desired features from the tables that follow. The chart below, describes how the model code is built up. For assistance in configuring a switch that best suits your needs, please contact your local sales office.

NOTE: Options shaded in the following tables are the most common options and are available on the quickest lead-times and at the lowest cost.

NOTE: Only the most common options are shown in this data sheet. Should you require a feature that is not shown, please contact your local sales office for further details.

Technical Specification

Industrial Series Models: S21, S22 & S24	Accuracy:	Set point repeatability $\pm 1\%$ of span at 20°C / 68°F ambient.
	Storage Temperature:	-25 to +60°C / -13 to +140°F
	Ambient Temperature:	-25 to +60°C / -13 to +140°F For continuous use below -25°C (-13°F) we recommend using only enclosure H, R, T, U & A with special gaskets and limited switching.
	Maximum Process Temperature:	Subject to appropriate installation practice, the component parts withstand up to +60°C (+140°F). For process temperatures up to +120°C (+248°F), order WETTED PARTS Code A (Table 4). For higher temperatures, refer to SPECIAL ENGINEERING.
	Enclosure classification:	IP66 / NEMA 4X / Flameproof Ex d
	Switch output:	SPDT or DPDT snap action microswitch (standard) Hermetically sealed (optional)
	Electrical rating:	See Table 6
	Process Connection:	Rc 1/4 (BSP), 1/4 NPT Internal, 1/2 NPT Internal, 1/2 NPT External
	Approximate Weight:	2.7kg / 5.9lb to 6.6kg / 14.5lb depending on model

Enclosure

TABLE 1

FINISH

All enclosures except Type R, A and U are finished in light grey epoxy resin paint.

Special finishes to order.

INTRINSIC SAFETY

Because of the low voltages and currency of I.S. circuits, we recommend using gold and/or sealed contacts.

NOTE: Codes H, 2 & T for 4X

Aluminium Enclosure protected by quality epoxy paint system.

Performance of enclosure requires careful installation and sealing of cable gland connection in site.

Assembly requires to be built for Marine use, See Table 8, Code 02.

NOTE: Codes 2 and 3

To be used on S24 only with S or T wetted parts.

NOTE: Codes 5 and 4

To be used only on switch codes 04/05, 0G/0H, H2/H3/H6 - See Table 6. PED Cat IV not available at present.

Temperatures in Table 1 refer to limitations for certified enclosures.

See **TECHNICAL DATA**.

WELDED CONSTRUCTION Codes S and T

For reduced risk against leakage under extreme or unusual conditions the diaphragm may be welded directly to the process connection, eliminating the O-ring.

Welded construction not available on ranges CC to CE (CW to CK). (See table 5).

 Applies to all materials.

Performance Data

TABLES 10E, 10F MODEL S22 ADJUSTABLE SWITCHING DIFFERENTIAL

Due to manufacturing tolerances the figures quoted in these tables are for guidance only.

Flameproof models maybe up to 2 times higher depending on the range.

Should the differential be critical for specific applications, our engineers should be consulted prior to ordering.

Electrical Connections

Terminal Block

Cable entry is to a non-pinching terminal block made of a non-hygroscopic thermosetting plastic, suitable for cables up to 2.5mm²/14AWG.

Earthing/Grounding

An earthing stud is provided inside all weatherproof enclosures, adjacent to the entry. External earthing is standard on flameproof versions. Safety note see Table 3.

Dielectric Strength

The electrical assembly is capable of withstanding *2kV between live parts and earth/ground and 500V between open contacts.

* 1.2kV for micro switch Codes H2, H3, and H6. Refer to Table 6.

Electrical Entry

Standard options are listed in Table 3. Other threads can be accommodated by adaptors. Dual entry available, see Table 3.

Optional Extras

Chemical Seals

Chemical seals of our own or proprietary manufacture can be fitted when required.

Mounting Position/Location/Installation

Vertical as shown, IN DIMENSIONS, taking care to avoid siting in locations that transmit excessive shock or vibration. For further advice contact our engineers.

Pollution degree (EN60947-5-1)

All products are suitable for use in pollution degree 3. For extreme conditions where condensation may readily form, then sealed contacts should be used. See Table 6 Codes 08/09, 0G/0H, H2/H3/H6.

Electrical Isolation

These products are not suitable for electrical isolation. Always isolate circuit separately to carry out any electrical work.

Approvals

EUROPEAN DIRECTIVES

Low voltage Directive (LVD) 2014/35/EU.
Compliant to LVD

Pressure Equipment Directive (PED) 2014/68/EU:
This product has a process connection size \leq DN25 and is therefore categorised as sound engineering practice under Cat 3.3

ATEX Directive 2014/34/EU

INTRINSIC SAFETY:
Certificate No. Baseefa05ATEX0111
EN 60079-0, EN 60079-11

For Zone 0 models (**Enclosure code 4/5, see table 1**)

Because of the low voltages and currents of intrinsically safe circuits, we recommend using gold contacts.
Refer to Table 6.
